

Eagle Lake Property Owners Association

June 15, 1991

Eurasian Watermilfoil is a non-native aquatic plant that can grow rapidly and become a nuisance to boaters, swimmers and fishermen. It is currently present in Eagle Lake.

Since any lake treatment of the Eurasian Watermilfoil might have an impact on the usage of Eagle Lake's water, it is important to know exactly how the lake's water is currently being used by each lake resident. In order to obtain this information I am requesting your cooperation in filling out and returning the below questionnaire to the Eagle Lake Property Owners Association.

Bill Allen

ELPOA President
