Hello Lakers

We went to camp for new years only to be greeted with an ice storm and no power. The trees had been coated with ice and when the wind picked up many trees came down. There were many trees down across Rt. 74 I would suggest you check your camps or have someone check it for you as soon as you can ,just to be sure. Also please pass this information to as many friends on the lake that you can. Thanks. Jack & Deb
