Hey, Spoke with Stecs office person. She spoke with Stegman right after Betty little's Office had called him about the ramp. She said there have been lots of calls to Stegman and letters, she mentioned Rolfs name. He's passing it off to the next person, he totally understands the situation and said he hoped they or somebody will do something about the ramp. He said the APA had to be on board to. I asked if there was anything else I could do? She mentioned maybe a letter and I told her I already did one. She said she will call me with any updates and that I should stay in touch with her. If there is something you need me to do let me know. Thanks Dave

**Subject:** Hammond Pond Wild Forrest Draft Unit Management Plan

David P. Cerny 1943 State Route 74 Ticonderoga N.Y. 12866 To Whom It May Concern, I object to the D. E. C re-evaluating state land in various lands around Eagle Lake, located in the town of Ticonderoga. This is known as the Hammond Pond Wild Forrest (HPWF). A public meeting was held in November and was poorly attended because of the lack of notification. The D. E.C is going to essentially close the boat launch as we know it and make it a carry in access point, by putting up a barrier to prevent float off launching of boats. Also two campsites will be close on the Crown Point beach. This launch closure effects the whole community. Emergency services would no longer have access to the lake in a timely fashion. Fire Department, Ambulance, State Police and Forrest Rangers responses will all be hindered, this could be the difference between life and death. Some land owners won't have access to their own property. The launch closure effects my family and property directly because I don't have a

private launch. My family and I have been boating on Eagle Lake for 20 years and this could potentially end that. Has any thought been given to the negative effects on the current property values around the lake? It seems the whole community will suffer the direct consequences for not continuing to research alternative solutions. Government is supposed to help and assist its citizens not dictate and punish them. This Draft Unit Management Plan has been around since the 1970's ( what's the hurry let's get it right for everyone's sake). Going forward let's open up the public comment review so the people can participate in this process. Sent from my iPad Thank You , David P. Cerny Sent from my iPad
