Rolf,

I'm following up here with the survey data that DEC collected for Eagle Lake. The data consists of the following:

Vehicle data

Vehicle data was recorded during random stops in 2020 and 2021. This includes the number of cars in the parking lot and the number of cars parked along Route 74. There is reference to installing trail counters. An attempt was made to install trail counters at the parking lot as well as beneath the Route 74 bridge to capture the number of cars entering / leaving parking lot and number of boats traveling beneath the bridge. Counters were only used for a short period of time and were removed because the data was determined to be inaccurate due to unexpected factors such as nesting birds beneath the bridge. For 2022 any parking lot data that was collected is incorporated into the boat surveys and is reflected in the boat survey spreadsheet.

Boat counts and surveys

Boat count and survey data collection followed the Citizen Statewide Lake Assessment Program protocol. This protocol included lake-wide counts of boats as viewed from the lake at the beginning and end of each season as well as periodic observations of the number of recreating boats on the lake throughout the season. A boat count was not conducted at the end of the 2021 season.

Thank you.

-Ben

Megan,

Just to let you know, message for meeting time and date and separate but associated email for procedures to join were received by me. I will check in with our EL folks to see who will be joining and confirm their receipt of procedures email.

Have you checked with Ben Thomas, or other DEC staff, to see if any study data collected related to the boat launch would be available prior to the meeting? My last conversation with Ben, early last week, indicated that he needed to check with his boss, but did not see a reason that it could not be shared.

Thanks

See you at the meeting on Wednesday

Rolf

Good morning Rolf,

I relayed a WebEx meeting invitation for 9:30am-10:30am on Weds 2/1. Feel free to forward that invitation as you like. WebEx enables videoconferencing, but participants can choose to simply dial in using their phones. To do so, dial 518-549-0500 and when prompted enter the meeting number: 161 489 6279. You may be prompted for a participant ID, but you can simply hit the # key at that time and you will be connected to the meeting. Let me know if you have any other questions. I am looking forward to the discussion.

Megan

Megan,

I checked with my fellow officers, and many have indicated that they are able to take time during their work day to join in a virtual meeting with you and the others included in your initial email meeting list.

The time indicated by them as being available is, Wed Feb. 1st or Thu. the 2nd from 8:30 am to roughly noon, Friday the 3rd will also work for a slightly smaller group. The 2nd and 3rd week of Feb. for most of us looks to be considerably busier. Hopefully you can make the first 1st week of Feb. work.

Please share timely the requirements for joining a virtual meeting as not all of us are familiar with this form of communications.

Thank you for sharing the meeting agenda (received since this was written this morning)

Hopefully you will be able to share your outline and collected data in advance of the meeting so that my fellow officers can review and interact as needed prior. Please understand that we are all volunteers and take time for lake association activities between work and personal activities.

For planning purposes do you have an anticipated time length associated for this meeting.

As mentioned in my phone call with you I've cc'ed Keith Schere in this email, he, as retired Senator Little's representative, along with in 2019 Assembly person Stec, showed and provided ELPOI with considerable support and information with respect to the EL boat launch discussion.

Last, the ELPOI Officers and Board Members who will not be able to join in the meeting, asked if a post meeting transcript, summary, and or minutes would be made available from your end, or if a video recording might be available.

Please let me know which of the proposed dates work, and what time fits best for you.

Rolf Tiedemann
