RE: NEW DAM

Henry G. Williams
Commissioner

September 25, 1986

Dr. Joseph Kane, President
Eagle Lake Association
Star Route
Ticonderoga, NY 12883

Dear Doctor Kane:

Our Division of Operations has recently completed an engineering survey of the dam site. Work plans have been drawn for the new spillway and we now have the necessary monies to do the job.

The dam will have a new adjustable spillway to accommodate periods of high and low water. Once the spillway is in place, the Department will officially request the Eagle Lake Association to oversee maintenance of the water levels at whatever height the Association so desires. The mean elevation of the spillway will be at four inches below the steel reference pin. Also, the spillway's splash boards will have a locking device to prevent unnecessary tampering of the water levels. A lock and keys will be provided to the Association.

Once again, thank you for your assistance and your patience. When we commence actual work on the dam, I will contact you.

Sincerely,

James R. Papero,
Forester
