Mr. Whitman Daniels
Box 2036, Coronado Sta.
New Smyrna Beach, Florida 32069

Dear Whit:

This is in reference to your recent letter concerning the status of the Route 74 project.

Following our meeting last summer, I directed my Planning and Development Group to re-evaluate the feasibility of a new location alternative. We also initiated a request to change the Consultant agreement. Before the agreement can be amended, the planning studies must determine a new location is feasible. I anticipate completion of the planning report and circulation for review in Spring, 1980.

The Consultant agreement was approved in early December, 1979 and they began collecting information. At this time, the consultant activities are limited to the existing alignment improvement. When the planning studies are complete, the agreement will be amended to include a new location alternate.

Thank you for your interest in this transportation matter.

Sincerely,

Charles E. Carlson
Regional Director
