WATER ANALYSIS REPORT

SOURCE Lake BACTERIA PER ML., AGAR, 24 HRS. @ 37°C: 1080

TEST FOR COLIFORM GROUP: Negative *M.P.N. PER 100 ML. _____

REMARKS:

The results of the bacteriological examination shows the absence of microorganisms of the coliform group in the volumes tested, and therefore, signifies the absence of pollution in the sample submitted.

The record of inspection that accompanied the sample does not have sufficient information to serve as a basis for an opinion as to the sanitary quality of the supply.

In view of this data, the supply can be considered a satisfactory source of drinking water.

VERY TRULY YOURS,

WESTCHESTER CLINICAL LABORATORIES, INC.

J. Blachman, MT.
