

# 2011 Adopt-A-Highway Report

## Tonya Whitford Condon

So far this year, I have done 3 major clean-ups along Route 74 in Eagle Lake. Heavy spring rains and an injured shoulder hampered my efforts early on. Andy Belkevich donated two new gopher grab sticks to my cause. Thank you Andy. Anyone wishing to help out by picking-up the road on their own is welcome. I have orange bags and safety vests. Call me at 585-9044. Orange bags are accepted free of charge at the Ti Dump if you tell them what they are. Do not leave any bags beside the road, as ravens tear them open and scatter the trash. It would help greatly if people could pick-up in front of their own homes and camps this summer. Areas that need extra attention include along the causeway on both sides; from Forrest Lisle's property to the snowplow turn-around; the snow plow turn-around parking lot; where people park for cliff jumping; and along the cliffs where people dive; and at the east entrance to Eagle Lake from the waterfall to the antique store on both sides. I will continue to clean-up this summer and fall when my schedule permits. Last year marked 10 years of service and 100 clean-ups for me.
