Bill Allen  
Jim Davis  
Rinaldo Fraize  
Cole Hickland  
Patricia Hyde  
Roger Wickes

Established in 1907 and incorporated in 1993, the ELPOI is a not-for-profit organization that serves to protect the mutual interests of its property owners and to maintain the environmental and recreational quality of Eagle Lake.

The ELPOI newsletter letter is a publication used to communicate with the ELPOI membership. It is authored by Rolf Tiedemann and edited by Dianne Tiedemann and the ELPOI Board of Directors. Address questions and comments to ELPOI Vice President Lloyd Burroughs, 7 Prospect Lane, Ticonderoga, New York 12883-9410 or email her at eaglake@aol.com. Distribution costs are underwritten by a grant from International Paper, Ticonderoga NY.

---

The Eagle Lake Property Owners Incorporated (ELPOI), was organized in September, 1907 for "the protection of the mutual interests and property of the members" including "For the prevention of the pollution of the water in Eagle Lake..." (from the *Constitution & Bylaws*.) Membership dues and contribution's fund ELPOI, a not-for-profit organization with 501 (c) (3) status. Contributions are fully tax-deductible to the extent allowed by law. If your employer matches charitable contributions, please inform your employer of your contribution to ELPOI so a matching contribution can be made. Your lake will benefit.

---

June 19, 2001

Hello Members and Friends,

I just returned from a wonderful but wet 4-day Memorial Day weekend at our place. It was good to look out Saturday night and see so many lights on around the lake. Just being able to be on the lake is a great feeling. Just think in a few short weeks summer will be here and we will be out on the lake enjoying all the traditional activities. I'm looking forward to seeing and hearing from everyone at the 94th Annual Membership Meeting and family picnic on July 7 at 10:00 am at the Chilson Community Center on Putts Pond Road.

Sharon Zankel has been working hard putting together the mailing information for our annual meeting and membership renewals and is making plans for what she promises to be another excellent after meeting picnic. At one meeting I attended another attendee asked how a relatively small lake as ours got to be so well known in the State! My reply was that it was the result of all of our members supporting both myself and the Board of Directors. Thanks to all of you for this!!! I ask that you fill out your renewal notice and send the RSVP for the picnic so that we can plan to once again include you. Even if you can't attend we still would enjoy hearing from you. Be sure to exercise your proxy if you are unable to attend.

This year's meeting should be very exciting as the Board and I have details regarding many new things that took place over the past 12 months. This newsletter gives details relating to a few of these items. Additional details and questions will be addressed at the meeting. It also contains the minutes of the July 8, 2000 Annual Membership Meeting to jog your memory as to where we were last year and for your consideration for approval at this year's meeting.

A number of properties were sold this past year. Please join me in welcoming all of these folks to Eagle Lake. We look forward to meeting with all of you at the July 7 meeting. I hope that you will stay to join us for the annual picnic that follows.

Respectfully, Rolf Tiedemann, President ELPOI

---

### **Lake Management Survey**

Rolf and the Board have been working with several lake management professionals in reviewing our lake management/ interest survey. They hope that the survey will provide us, as well as members of the State, with definitive information about how you the membership want our lake and watershed to be maintained. The survey is scheduled to be mailed late in June. Rolf encourages you to thoroughly read the survey, take the time to answer the questions and return it. Merilyn Emerich offered to cover the return mailing cost. Thanks to her and to Sue and Floyd Barwig for helping with the survey's preparation.

### **Sweat Shirts**

There are still several Medium, Large and Double Extra Large limited edition "Eagle Lake Property Owners" sweat shirts available for \$12.00 each. Sales so far have brought in \$450, covering the initial costs of printing and netting about \$100 for our treasury. Everyone that has seen the shirts has commented about how nice they are. Get yours at the meeting or let Rolf know your interest and he will get you one.

### **Picnic Guests**

Invitations have been extended to our Town Supervisors (Dale French and Mike Connery) as well as several other supportive individuals. Please plan to attend the meeting on the 7 and extend your thanks to these people.

### **Adirondack Research Consortium (ARC)**

The next scheduled meeting of the ARC is in late June. We are planning to be there to continue with discussions as to how a centralized Park lake management body could be formed, how they could be funded and what responsibility they might have.

### **Army CORPS of Engineers**

Rolf and the Board are busy trying to determine what we can expect from the Army Corps of Engineers when they come to our lake and do a scoping report on July 2. The scoping or reconnaissance visit is part the \$10,000 Waterfront Revitalization Development Act (WRDA) program that Congressman Sweeney got us involved in this past Fall. We will fill you in on the details of their visit at the Annual Meeting. If you would like to be involved with this process contact Rolf at (716) 647-2514 or (518) 597-3618 or RTiedema@greece.k12.ny.us so that you can join us and the Corps for the July meeting.

### **Web Page \*\*\*\*We've Moved\*\*\*\***

***EagleLake1.org*** is our new address  
Carlos Alden has been steadily working at making our web page a useful addition to our communications tools. He recently retained the Domain name of "eaglelake1.org" as the location to move our site to. Uploading information to the old address site was not very efficient, making the switch necessary. Several conference attendees have commented to Rolf that it's

neat that we have the site and can share information with our membership that way. Hopefully everyone has had a chance to check out the site by now. Carlos reports that he is working on posting a lot of new information and it should be ready about the time you read this. Check it out, send him some history, and let him know your reaction. If anyone has an interest in working with Carlos on web development/ updating contact Carlos through the web master link.

### **Acentria Moths**

Rolf has been in touch with Bob Johnson, Research Scientist from Cornell University, on several occasions this past year about the discovery of Acentria Moths in Eagle Lake. Bob is the regional expert on herbivores and biological control of milfoil. He is doing the Acentria Moth augmentation work on Lincoln Pond, and has also worked on Schroom, Saratoga and many others' lakes across the Northeast. This past November Rolf sent Bob two samples of milfoil from the patch by Charles Island. Bob identified in these 2 samples that we had a high enough number of adult Acentria Moths in this location to be of significance for further investigation. Bob has offered to come visit our lake this summer, at no cost to us, to survey the potential impact that the newly discovered, in our lake, Acentria Moths will have on "our" milfoil. His plans at the moment are to conduct this survey when the Corps visits. He has also offered to help advise us as how best to proceed with our lake management planning in light of the moth's presence in our lake.

### **Positions Open, Volunteers Needed !!!!**

***(1, 2, and two 3 year Board vacancies, Treasurer, and possibly Vice President)***

Bill Allen has expressed his desire to retire, yet again, after serving for so many years. He has one year left to serve and would be glad to help get someone started. Rin Fraize has offered to take over the position of Treasurer. We are in need of a person to serve out his remaining 2 year term as Board Member. Roger Wickes' retirement opens up a 3 year position. Todd Condon and John Pynn have offered to accept nominations to fill two of these Board positions. Cole Hickland has offered to serve again on the Board after stepping up to fill the position vacated by Rolf when he was elected president. Lloyd, after serving for Vice President for many years, has indicated that this coming year will be her last. With all the changes the score is that we are still looking for one person to help fill a Board position and one to fill the Vice Presidents position. If you would like to start now here's your chance. You do not need experience or need to live in Essex County to serve on the Board or be an officer, You just need to be a member of ELPOI and have an interest in keeping Eagle Lake #1. Contact Lloyd Burroughs at (518) 585-7277 or eaglake@aol.com to let her know your interest.

### **With Sympathy**

It is with great sadness that I report the passing of several members this year. Robert Emerich, my father-in-law, died in October after a sudden but short illness. He had been a supportive member of the ELPOI for many years. Jean Archbald one of the oldest members also passed away suddenly, shortly after our annual meeting. Jean was a great backer of the ELPOI and had been active for many decades. Another person that was very close to many on the lake, Lloyd Benedict also passed away this Spring after suffering for several years. Lloyd spent many years working around the Lake and his work and kindness will be missed. Our sympathy is extended to all those that lost loved ones this past year.

### **Well Wishes**

Several members have had major surgeries this past year, among them are Jim Davis, Ruth Cummings and former member John Cully. We all wish you well!!!

### **With Thanks**

As another year for our 94 year old organization begins this July, it's only fitting to stop and give a round of thanks to all of those that have helped our organization in the past. Thanks to Bob Stevens our past membership list manager for his many years of keeping track of who and more importantly where we all live and for providing a seamless transition to Rin Fraize as he takes on this role. A giant thanks is necessary for Peter Buechner for keeping the books for the ELPOI for more than the 20 years that I've been involved with the ELPOI. Roger Wickes will be retiring from the Board after serving the maximum of 2 consecutive 3 year terms. Roger provided much of the guidance and leg work to get our organization incorporated with a sound set of by-laws. Thanks to the Burroughs for everything: Adopt-a-Highway coordination, CSLAP water collection, membership renewal/ recruitment liaison, spillway beaver dam debris removal, and the 100 other things that I didn't mention. Thanks to those that have helped the Burroughs and joined them in the many tasks that they have completed. Thanks to Rin Fraize for his efforts on getting our mailing list data transferred from Bob Stevens, updating it with all the new members, wrestling with the new 911 addresses, as well as all his efforts in collecting and compiling the data for our permit application to the APA. Thanks to Cole Hickland for keeping track of all of our water testing data. Thanks to Pat Hyde, Jim and Wendy Davis and Bill Allen for all of their encouragement and responses to the many questions I ask. Thanks to Caroline Baldwin for keeping track of all the things we say at the meetings and providing use with clearly written agendas and minutes. A giant thanks to Carlos Alden for all his efforts in getting us on the Web with a great looking, informative and growing Web page. Thanks to Joe Muehleck who has tracked and reported on fish stocking for years. Joe is stepping down so that he can spend more time trying to catch all the fish they have put in our lake. Bill Allen

has offered to take over this important task. Thanks to Town Supervisors Mike Connery and Dale French for being the conduit that we work through. Thanks to Washington Lobbyist Tom Hebert of Capitol Link, Congressman Sweeney and his Aid John Boling for getting us involved in the WRDA and Corps. Thanks to Senator Stafford and his Aid Peter Repas for providing us with the \$25,000 grant and for keeping the issue of nuisance aquatic plants in front of people in Albany. Thanks to all the folks that I have bugged with questions in Local, State and Federal government there are too many of you to list but you have all been extremely supportive. Thanks to Bo Burns, Glen Sullivan and Ken Wagner because without their continued interest and expertise lake management would not happen anywhere. And the last thanks go out to all of you for your efforts in removing the countless beaver dams, checking the water level, picking up the trash along the road, minding the beach, etc. etc..

### **Adopt-A-Natural Resource**

Efforts to workout an agreement with the DEC for our continued ability to help with lake level management have paid off. We have in place an Adopt-A-Natural Resource (AANR) agreement. This agreement is good for 5 years compared to the previous 1 year agreement. The exciting change on this agreement over our previous one is that any member who works on lake level management, or beaver dam material removal for the same and signs a State form, is covered by the NYS Workman's Compensation Policy if they are hurt. I believe this is a major plus. I'll have copies of the forms at the meeting so that you can sign up. The AANR also provides; publicity for the ELPOI, signage related to the AANR, dam maintenance by the State, and that the State (at our request) will remove piled dam debris.

### **Beavers**

Paul Burroughs reports that the beavers are still active and are being addressed. Expert trapper Jim Hebert spent a lot of time last summer and fall trying to catch the beavers. He is frustrated that the beaver escaped his efforts last year, but promises to keep at it. Paul has asked that anyone who can help with clearing the debris at the spillway please do so. Just be sure to pile the removed materials on the existing piles on the left and right of the spillway. Our AANR specifies that the State will periodically remove these piles. This just in through email, Paul reports that there are 2 less beaver engaged in the building. A major thanks is extended to all of you for participating in the dam removal task. Plan at least one swampy area removal project for early July.

### **International Paper Grant**

Our search for funding to help with membership communication and education was responded to by the hard work of Todd and Tonya Condon. Their efforts helped us secure a grant for \$474, the maximum we qualified for, from International Paper. Acceptance of the

funds will take place at an International Paper Grant Distribution Dinner scheduled for the end of June. Tonya, as the grant writer, will accept the check on our behalf and express our formal thanks. She will be handing over the check to us at the Annual Meeting. Plan to join us to say thanks for her effort.

#### **Beach Signboard**

The replacement sign board that was talked about for the beach several years ago is now completed. Forrest Lisle and Pat Hyde have offered to try to locate some new information posters for the sign board. If anyone else has information that they think would be appropriate to post at the beach or the boat launch let me know.

#### **Membership**

Rin Fraize reports that for the year 2000 - 2001 we had 61 paid members of which 3 are associate members. An accurate count of all eligible properties showed that there are 90 properties around the lake eligible for membership. Eight owners have multiple property ownership. This provides us with an outstanding 70% membership. People at conferences that I have attended really take note of this. I would love to see our total membership reach 100%, let me know what we need to include to get everyone's support.

#### **End of Season Social Gathering**

Several people have expressed an interest in getting together towards the end of the summer for a social gathering. Ideas were to bring a grill to the beach and folks bring a disk to pass. Sharon Zankel has offered to gather your input on this. See your renewal notice t give input. Please offer to help out if you are interested.

#### **Storm Water Report**

The report for our \$15,000/ \$7,500 matching grant from the Department of State (DOS) was delivered to the DOS and us in mid March. I am still in the process of reviewing it with DOS grant representative Jeff Beach. I'm hopeful that the two of us can complete the paper work for this soon.

#### **Fort Ti Video Donation**

Bob C. Stevens has secured a spectacular video of the history of Fort Ticonderoga and two guest admission tickets for us. These will be given away at the Annual Meeting on the 7th. Check the membership renewal notice for details. Bob also reports that any local Ti or Crown Point resident property owner can visit the Fort free of admission charges. Check with Bob or the Fort Admissions Attendants for more information.

#### **Ice Out**

The Burroughs report that ice was completely out on May 1st this year.

#### **Committees**

The ELPOI maintains the following committees for the protection of the Eagle Lake Watershed and the education

of it members. Please support and offer to help these folks. Also report any noticable changes in and around our lake to them.

Adopt-a-Highway the Burroughs

Adopt-a- Natural Resource Coordinator Rolf Tiedemann

CSLAP Water Sample Collection The Burroughs

Education Forrest Lisle

Fish Stocking Bill Allen

July Picnic Coordinator Sharon Zankel

Lake level Lou Zankel, Paul Burroughs, Rolf Tiedemann

Membership List Management Rin Fraize

New Member Recruitment Lloyd Burroughs

Web Page Maintenance Carlos Alden

Weed, Pollution And Historical Lake Data Management

Cole Hickland.

#### **Donations**

The ELPOI is a 501 (c) (3) not-for-profit Corporation. It is a volunteer run organization established to protect the interests of Eagle Lake. The organization relies on member donations for its communications and education efforts. Please consider making an additional tax deductible donation so that we can continue keeping the members of the Eagle Lake community informed. Contact President Rolf Tiedemann regarding this. Rember that this years extra donation could result in your winning the Video of the Fort and the Admission tickets.

#### **Feed the Birds, PLEASE DON'T**

Experts indicate that feeding the ducks and other waterfowl can lead to the following health concerns. 1) Swimmers itch, a rash caused by a parasite present in waterfowl fecal material. 2) Possible fecal coliform contamination of lake water used by some for drinking. Those feeding the ducks will be the ones most likely to suffer since birds tend to stay in these areas.

#### **Zebra Mussels – We Don't Want Them!**

The Lake George Park Commission (LGPC) just sent out a multipage "Special Edition Newsletter" urging all boaters, divers and fisherman to be extra careful as they move from one water body to another. Lake George had divers remove the colonies, but Lake Champlain has them. If your family, or someone renting your place, trailers a boat from other lakes to ours, be sure they drain and dry out the live bait well and use a mixture of Clorox and H2O to wash down the bait well, the bilge and the hull. Do this away from the lake shore. Be sure they flush the boat motor as well. Zebra Mussels can live in a damp environment for up to a week or more. Remember THERE IS NO WAY TO GET RID OF THEM once they enter the lake! Contact the LGPC at 518.668.9347 to learn more.

**Highlights of the Annual Meeting and Minutes**

*July 8, 2000 at the Chilson Community Center*

The Annual Meeting of the ELPOI was called to order at 10:10 AM on July 8, 2000.

President Rolf Tiedemann welcomed all. He pointed out the available educational information/ brochures, SePRO, Rules of the Road, Safe Boaters, PWC, Supplemental EIS, Septic Report.

No guests were present. Several had been invited but reported being they were unable to attend.

Introduction was made of new property owners: *Tonya & Todd Condon* who moved into the yellow house by the chlorination station and *Charles Robinson* who purchased the Geisel property.

There was a moment of silence in honor of those lost during the past year: specifically *George Conklin, William Kral, and Ruth Watters*. A sympathy card for Anne Conklin on the loss of her husband George was circulated.

Bob Stevens asked that members update their addresses on the sign-in sheet, including email addresses.

Voting proxies from absent members were collected.

Minutes of the July 1999 meeting were accepted as written and recorded in the June 2000 Newsletter.

**Treasurer's Report 7/1/99-6/30/00**

Peter Buechner gave the Treasurer's report-  
\$1,934.59 total expenses  
\$1,879.00 total income  
\$2,836.24 balance on hand June 30, 2000.

The report was accepted as presented. Members were invited to give money to Peter for dues, the fee for the picnic, and for the purchase of sweatshirts. It was suggested that ELPOI may not want / need to pay dues to COLAM because it looks like it is inactive and may be about to fold. Wendy Davis ran it very well and Bill Allen worked hard on it.

**President's Report**, focused on the milfoil eradication effort. Increased milfoil growth is evident this year in Eagle Lake. Using SONAR to eradicate the milfoil would cost an estimated \$110,000. Since members have pledged \$23,360 and the Senator Stafford grant is \$25,000, an additional \$61,640 would be needed. Investigation of other sources for funding and support is ongoing. The towns of Ticonderoga and Crown Point and many others have been helpful.

• Rolf reported that attendance at the FOLA conference was very worthwhile, particularly discussion of lake management practices. He is learning more about the use of moths to counteract milfoil. That method can be very costly. Are moths present in the lake? Forrest Lisle said an article in June, 2000 Adirondack Life speaks to the use of moths. His report on that was deferred to the Education Committee report.

Elections of Officers concluded with the secretary casting 1 ballot for those nominated:

President	Rolf Tiedemann
Vice President	Lloyd Burroughs
Treasurer	Peter Buechner
Recording Sec.	Caroline Baldwin
Corresponding Sec.	Sue Barwig

For the Board of Directors, there were 3 people nominated - *Rin Fraize, Pat Hyde, Sue Hoag* - to fill two 3-year positions on the Board of Directors. Election was by paper ballots. After an hour elapsed, in case any late arrivals wished to vote, the count showed **Rin Fraize and Pat**

Hyde received the most votes and were thereby elected. Thanks were given to all who offered their services.

### Committee Reports

**Membership**, Lloyd Burroughs reported 58 paid memberships for the total 78 properties. The recent newsletter included a property location map for which any corrections should be given to Rolf. Members need to speak up about the milfoil issue so the ELPOI can gain a consensus.

**Education Committee**, report by Forest Lisle focused on the potential of moths for eating milfoil, including their advantages as a natural and continuing method. He referred to an Adirondack Life June 2000 article about moth/milfoil research by Bob Johnson of Cornell Univ.

- Jim Davis agreed that a natural treatment would be most desirable but cited the high cost of treating the whole lake with moths and their very gradual effect. SONAR quickly eradicates beds of milfoil.
- Rolf assured the meeting that the Officers and the Board are open to all options and alternatives for milfoil control. Other lakes are trying different procedures, including SONAR, hand harvesting, moths and weevils.
- Forrest also spoke about black flies. He sites there are 150 species around the world, the female does the biting.
- Rolf said Cornell Cooperative Extension and CSLAP will identify insects, causes of tree death, etc. for anyone finding something they can't identify.

**Septic Dye Testing** of lakeside properties has been successfully completed: over 80% of the properties were tested and 100% passed. The report, written by Dianne and Rolf Tiedemann, was filed with the DOS for grant purposes and with the Towns Town of Ticonderoga and Crown Point. Individual property test results are on file with Ticonderoga and Crown Point Building Depts. All

owners of tested properties should have received an "Adequacy Letter" last Fall. Rolf announced that the report is available to the meeting. Other publications with information about milfoil controls were available at the meeting, including a SePRO publication Current Quarter, the Supplemental Environmental Impact Study (SEIS)

**Sign Board** at Boat Launch will go up soon. The sign board at the beach needs renewing and will be addressed this year.

**Weed and Pollution Committee**, Cole Hickland reported: lake clarity continues to be good; Eagle lake has been accepted into CSLAP water testing program the Burroughs have offered to handle the sampling; volunteers are needed to manage testing for fecal matter.

- Don't feed the ducks because their droppings in the water can cause swimmer's itch. Also, beavers residing around the lake may contribute Giardia bacteria to the water and, thus, should be discouraged.

**Water Level Committee** reported that ice went out April 5. NY DEC direction is for water level at plus/ minus 4 inches. Officially, the water level is controlled by adjusting boards in the State dam. With *no boards* in the water level will reach (minus) -4; *with one board* the level will be (zero) 0; *two boards* yields (plus) +4, all levels are with no water going over the spill way. Now, the gauge at the causeway shows water height at plus 6 to 6 1/2. Unofficial water level control comes from beaver activity. In mid-June and end-June beaver dams were removed. Beavers are back! A volunteer work party was scheduled for 1 PM on Monday, July 10, to dismantle the beaver dam.

**Fish Stocking** report was given by Joe Muehleck. He reported Crown Point Fish Hatchery put 800 two year old 10-12 inch Brown Trout in lake, NYS hatchery put 240 brown trout of 14+ inches and 4,370 smaller trout in the lake. "That seems

like so many that they should be able to be netted? Are they jumping the dam and going on to another lake?"

**Adopt-A-Highway Committee,** Lloyd Burroughs reported, on behalf of Paul, on the program to pick up trash along route 74. Paul indicated that everyone is pitching in and the road looks good. He again reminded folks walking along the road to use caution, Lloyd brought a sign-up sheet for volunteers so they could be given credit.

**Rte. 74 Construction Committee,** Ruth Cummings reported speaking with NYS DOT in Albany. Target date for reconstruction of rte. 74 is now 2009. Resurfacing is scheduled to begin mid-August with a big machine chewing up one lane of surface, mixing that with oil and asphalt, and then putting down a new surface. Ruth pointed out that the scraping machine does destroy some vegetation along the road edge and could cause more problems for driveways, water drainage ditches, and storm water run-off. (Rolf has a NYS DOT report from early 1970's on rte. 74 reconstruction which lists all of the then proposed plans, anyone interested in seeing it should contact him.) Bob Stevens says the State has a policy of not reseeding after roadwork. Todd Condon spoke about parking near his home by strangers, particularly in Fall and Winter. He wants large rocks be placed in front of his place so cars cannot park there. Rolf suggested that he contact NYS DOT directly regarding this. ELPOI and residents have sent letters to both the State and Ticonderoga Police and to the NYS DOT concerning speed and requesting signs saying "Driveways" with mixed success.

#### **Old Business**

Was covered in the newsletter. Peter Buechner offered thanks for the work done daily by Toby Secone in cleaning beaver construction out of the inlet creek at the eastern end of the lake.

#### **New Business**

Focused on suggestions for fund raising: e.g. sales of Eagle Lake sweatshirts; request for sponsorship of our newsletter mailing.

**Annual Contributions** approved for:

- Chilson Volunteer Fire Department
- Moses-Ludington Hospital Auxiliary
- Ticonderoga Emergency Squad
- Canoe and fishing poles are being raffled in support of Chilson Volunteer Fire Dept. Jim Davis thanked those who support that group through contributions to their annual raffle.
- Jim asked all to be sure to get floor plans to the Fire Department for Dept. files/ information.

*Next Annual Meeting will be on July 7, 2001 at 10 AM.*

- Ruth Cummings attended the Schroon Lake meeting July 7 where she heard a speaker who is Director for the Residents Committee to Protect the Adirondacks. He reported an estimated 150 moose now living in the Adirondacks. Do they eat milfoil? He reported the #1 complaint in the Adirondacks is activity of jet skis.
- Bill Knauss reported on a proposed NYS law which will permit townships to control the activity of jet skis.
- A lake management survey is under discussion by the Board of Directors. Volunteers were called for to work on the lake management survey, beaver dam management, water testing, annual picnic, etc.
- Rolf offered thanks to all officers, board members, committee members, supporters in Ticonderoga and Crown Point, SePRO, Chilson Volunteer Fire Dept., supporters in government, etc.
- Rin Fraize called on the membership to thank Rolf for his very hard work on behalf of Eagle Lake.
- Meeting adjourned at 11:50 AM.
