

(ADIRONDACK EXPLORER ACTION ALERT)

Let's hear it for Quiet Waters!

Now's your chance to be heard.

The motor-free St. Regis Canoe Area (above) can be augmented by designating 13 adjoining ponds as quiet waters (see map below).

In response to the *Adirondack Explorer's* Campaign for Quiet Waters, the state has created a Quiet Waters Working Group to study recommendations for designating more waters as off limits to gas-powered motorboats. At least 90% of Adirondack lakes and ponds are currently open to every kind of motorized recreation. If only 2-3% more water surface is added to the quiet category, this modest change would greatly enhance the Park's status as the finest paddling area east of Minnesota's Boundary Waters.

Please register your support for making the following waters peaceful:

- **Floodwood Pond Complex.** 13 ponds, 12 miles (see map).
- **Weller Pond.** Linked to Middle Saranac, 1.5 miles.
- **Eighth Lake** in the Fulton Chain, 1.5 miles.
- **Marion River** between Utowana and Raquette lakes, 4 miles.
- **Follensby Pond,** new Nature Conservancy acquisition, 3 miles.
- **Raquette River,** Long Lake to NY 3, 19 miles.
