Steve good job, looks like you removed quite a bit of debris. There was some back on sat. I removed that and the stuff downstream.

Went up again this afternoon
The beavers were busy

Probably half way to yesterday's dam
Cleared it out
Some of yesterday's cleanup fell out of the spillway and I cleared a bunch of that as well
In the near future that should be cleared out as well

Rolf

I forgot my phone when I went up but went back
The first shows everything cleared out
The second shows what went out of the spillway that I couldn't get
And the third shows the out side of the bridge that should also be cleared out of the stream

I was able to clear off the top of the dam / over the boards
While clearing I moved one log which was probably the linchpin
The water started gushing over the boards
I was not able to clear everything out of the spillway
The water was too fast and footing was slippery
Will follow up again tomorrow morning

Thanks Steve for the update and your work to clean out the dam. I e mailed DEC this morning requesting a permit. As soon as it is issued I will contact the trapper. Hope this message finds ALL of you and your family well. Jack

Subject: Re: They're back

like wise

need to check with DEC about a permit and contact trapper

lets not make this a game of summer time "wack a mole"

Was at the camp and decide to stop at the dam
Well , as you can see, the beavers have been busy
I will be back up tomorrow for two days and will swing by and clear out as much as I can
