Date: Tuesday, June 7, 2022, 01:16 PM EDT

Hello All

I just received the copy of the email included below from the Adirondack Park Invasive Plant Program (APIPP) group.

In their email they cover much about what they are doing with regard to invasive plants and the education about them and their related out reach, but in this mailing they make an announcement of a ***NEW*** boat law that will affect ALL of us with boats, etc. starting as soon as June 8, 2022, that's tomorrow!

see specific section

New Adirondack Clean, Drain, Dry Regulations in Effect Starting June 8

see APIPP email below

I've followed a few of the links in the email to the DEC's website for more details- It looks like this new law will in some way affect all of us. If you move your boat and/or water recreation equipment from lake to lake you will be required to Clean, Dain and Dry all of this equipment before the move. A good thing to prevent the spread of invasives, and something that most everyone is already practicing. If you **don't** move your boat or water recreation equipment the law doesn't affect you to the extent that you have to clean, drain and dry anything as you are coming out and going back into the SAME water body. However owners of all manners of boats and recreational water equipment, (tow tubes, water skies, tow ropes, fishing gear, removable boat hoists, life jackets, swim noodles, wake boards, stand up paddle boards, waders, etc., etc.) will need to have in their possession some type of certification form, either "state" issued or self-certified, that "documents" that the item(s) in question has gone through the clean, drain and dry process prior to being used in the water body it is in. As APIPP states hopefully there will be more information forth coming from the DEC on how this will be implemented and how it will affect EL residents that own boats, kayaks, canoes and the myriad of water recreational sports equipment/ toys we have in our possession to enjoy our time on the lake.

There may be more information available on this at the Annual meeting of the ELPOI on July 9th at 10:00 am at the Chilson Community Center if we can get more, but in the mean time please take some time to research this on your own to see how it will impact your use of the lake, especially if some one asks where you last used your recreational equipment. If you find out anything PLEASE share it with us/me at the email above. My schedule is full and I do not have much time to devote to researching this topic beyond what is shared above.

Rolf

Subject: APIPP News: Welcome to Invasive Species Awareness Week—Join us Tonight and June 8 for Adirondack Water Wednesday Events; DEC Announces New Clean, Drain, Dry Requirements for the Adirondacks

This message is being sent via the APIPP PRISM listserv

Dear Partners,

Welcome to New York's Invasive Species Awareness Week (ISAW) 2022! Organizations across the state are offering a variety of engaging events to promote invasive species awareness (click [here](#) for the statewide calendar of events).

Here in the Adirondacks, we are kicking off ISAW tonight from 6:00pm-8:00pm at Adirondack Lakes and Trails Outfitters in Saranac Lake with a campfire, s'mores, and more. You can also join in the fun during Adirondack Water Wednesday events on June 8 hosted by APIPP and the Paul Smith's College Adirondack Watershed Institute (AWI). See all the details below.

June 8 is also the day that the new aquatic invasive species law for the Adirondacks goes into effect. Read more from the NYS Department of Environmental Conservation (DEC) below.

June 6: 6:00pm-8:00pm ISAW “Kick-Off” Campfire and More!

Join AWI and APIPP for the kickoff of Invasive Species Awareness Week! AWI and APIPP staff will provide interactive activities for families, a brief presentation, and a clean-drain-dry demonstration at Adirondack Lakes and Trails Outfitters at 8 Church Street in Saranac Lake. Stop by and enjoy the fun. We'll have a campfire with snacks and s'mores. Registration is not required.

June 8: ISAW Adirondack Water Wednesday

June 8, 1:00pm-2:00pm Webinar: “Invasive Species for Lake Lovers”

If you love the lakes and ponds of NY, the “Invasive Species for Lake Lovers” webinar on June 8 is for you. Join APIPP’s aquatic invasive species coordinator, Brian Greene, to learn about ways invasive species can impact the quality of your favorite lake. Invasive species can have negative effects on the environment, the ecology, and the economy of our Adirondack waterways and communities. Brian will discuss ways large and small, obvious and obscure, that invasive plants and animals impact our lakes. More importantly, he will review simple steps everyone can take to prevent the spread of invasive species and to help scientists collect data. Register [here](#).

June 8, 2:00pm-5:00pm Family-Friendly Event at the Lake Flower Boat Launch

Get outside on Water Wednesday! From 2:00pm–5:00pm, you can join APIPP, AWI, the Adirondack Center for Loon Conservation, and the Ausable River Association for an interactive, family-friendly afternoon at Lake Flower in Saranac Lake, NY. This fun event is for those curious about aquatic invasive species and anyone gearing up to spend a summer on the water.

Drop by the Lake Flower Boat Launch in Saranac Lake to play games, learn hands-on identification of aquatic invasive plants of the Adirondacks, and get information on steps you can take to prevent the spread of aquatic invasive species to protect your favorite waterways. Please come prepared to spend the afternoon outdoors with a hat, sunscreen, sunglasses, and drinking water. There are public restrooms at the boat launch and parking will be available across the street at the former Nonna Fina restaurant. Registration is encouraged, and you can register [here](#).

June 8, 6:30pm-8:30pm Documentary “Uninvited” Screening at the Hotel Saranac

Come to the historic Hotel Saranac on 100 Main Street in Saranac Lake and join AWI and APIPP for a showing of “Uninvited: The Spread of Invasive Species.” The film is an hour-long documentary produced by DEC with funding provided by the Environmental Protection Fund. This professionally produced and highly engaging film dives into what can happen when invasive species are left unchecked and shows how strong partnerships and sound management can help protect our environment and our economy from the impacts of invasive species. Following the film, AWI and APIPP staff and partners will be available for questions and a brief discussion. The bar will be open for food and beverage purchases throughout. Registration is not required.

New Adirondack Clean, Drain, Dry Regulations in Effect Starting June 8

The following paragraph is forwarded from the DEC website. APIPP will share additional details about the new law as information becomes available.

“Beginning on June 8, 2022, all boaters operating motorized watercraft in the [Adirondack Park and within ten miles of the Blue Line](#) are required by law to possess certification that, before launching, their vessel has undergone measures to prevent the spread of aquatic invasive species by following the Clean.Drain.Dry. standards described in [NYS Regulation \(6 NYCRR Part 576\)](#).

These certificates can be acquired by visiting a DEC [designated aquatic invasive species inspection station](#) where boat stewards are present to inspect or decontaminate vessels and to provide boaters with a certification card. Alternately, boaters may perform Clean.Drain.Dry. steps themselves and then complete a self-issued certificate. A Self-Issued Certificate is available below to be printed and carried by boaters.

- [Self-Issued Certificate for Watercraft Prior to Launch](#) (PDF)
- Have questions about this new regulation? See DEC's [Frequently Asked Questions](#) (PDF)"

I hope to see you at one of the ISAW events!
