---

For those that want to see what it looks like as the ice goes out on EL today was the day to be watching. you can follow this link to the ELPOI website:

[http://eaglelake1.org/html/video/cameras/camera\\_select.php](http://eaglelake1.org/html/video/cameras/camera_select.php)

- Select the camera you want to view
- set the date to 4-13-2023 (should you go to this on a different date from now)
- select day images and select apply changes

Two images from my private camera are included below

Just a reminder if you have not signed the petition yet for the boat launch please consider doing so. you can follow the link by clicking on the QR code at the top of the ELPOI web page. we would really like to break the 1000 signature point by this week end. Please help by sharing the link.

Thanks to the 875 folks that have signed it as of 7:00 pm - your signature and support will go along way to getting this decision back on the table for a proper discussion.

Rolf
