Donna captured below is a screen image of those pictures that are available on the Eagle Lake 1.org website, a link for all those images is at the very end of this message. We unfortunately do not have any current pictures for 2023 the last time we took pictures was in 2021, however the process is exactly the same, you are welcome to pick any or all of the pictures from that link and use them as you see fit for your newsletter. If we get more this summer as we do sampling will be sure to let you know.

Should anybody be interested in what becomes of the test results from cslap and the in-house water testing that the elpoi does, they can be found in the second link at the very end of this message. If one looks at the time frame over which these tests have been completed it has been for many years. In years past when we have received a grant from International Paper and now Sylvamo your funds have paid for these tests which we are greatly appreciative of.

Also attached as a PDF is our fall of 2022 newsletter should you find anything in there that you would like to share as far as what we as an organization are doing to inform the community of the ELPOI actions and news events that are happening around the lake.

Thanks again have a great afternoon.

Rolf

2021 Water Testing Photos Page

Photos taken during the collection and data collection process for both the CSLAP and independent water testing conducted by the ELPOI during the summer of 2021. Photos by Michael and Rolf Tiedemann. Water test results for **CSLAP are available here** and test results from the **independent tests are available here.**

2021 Independent Water Tests

ELPOI Vice President Chris Hyde does an arms length grab sample of lake water in the mouth of Ti bay 2021-09-20. These samples are delivered to an approved NYS DOH lab with-in 4 hours for analysis for fecal and total coliform.

Donna, this is great news, Thank You!

We think of you when we are on the lake collecting and processing water samples for the CSLAP program, and be sure to mention Sylvamo in our newsletter reporting the results.

I will let you know when the check arrives.

I've cc'ed the rest of our Officers so that they can share this good news with their neighbors as folks start to return after the winter.

Yes spring is in the air, there is still considerable snow at our place at the lake, but we have the green house with this summers vegies started here in Rochester.

Again thanks for all you and Sylvamo due for our community.

Rolf

Rolf...I have processed a check request for a mill donation in the amount of \$750. You should receive this in 2-4 weeks. You are also eligible to apply for a Sylvamo grant. These are processed on a rolling basis and may take 60-90 days. I have attached the information for the grant portal. Spring is in the air! Donna
