ProcellaCor Spot Treatment Coming This Summer

10. March 2023 · Comments Off · Categories: [AIS](#), [Aquatic Invasive Species](#) · Tags: [AIS](#), [Eurasian milfoil](#), [invasive species](#), [milfoil](#), [ProcellaCor](#), [water treatment](#), [weeds](#)

The KLC has submitted a permit application to the NYS Department of Environmental Conservation (DEC) to treat up to five acres of Eurasian milfoil with ProcellaCor in June 2023. This is the same herbicide that was used to treat and eradicate over 200 acres of milfoil in 2021. This is a preventative measure to eradicate a few small patches of milfoil identified last summer before they spread and turn into larger weed beds that could interfere with boating and other recreational activities. The cost of the treatment will be covered by your donations to the Weed Management Fund. As required by DEC, ProcellaCor product labels must be posted on our website; see the sidebar Quick Links. Additional information about this summer's treatment will be posted here later in the spring.

Comments closed.

To report suspicious activity on or around the lake, please call one of the following agencies:

County Sheriff's Office: 518-828-3344
DEC Conservation Ofcr: 844-332-3267
For emergencies, please call 911
