Colleagues,

Now available from the Maine Center for Invasive Aquatic Plants and Maine Volunteer Lake Monitoring Program: **Maine Field Guide to Invasive Aquatic Plants, and their common native look alike**, by by Roberta Hill and Scott Williams. While this excellent 160 page field guide (I have a hard copy) was written for Maine, much (most?) of the information in it will be applicable throughout the Northeast. It is available in hard copy for \$13 plus S&H. [Click here to download the order form PDF](#). The guide is also on-line in PDF format for free at the Monitoring Program's website.
